## **PBN Partners with First Truly National Client New Client has 85 Offices Nationwide**

**Overland Park, Kansas** — Physician's Business Network (PBN), a Kansas City-based medical billing and medical practice management company, today announced that it has entered into a contractual relationship with a major national medical institution. PBN will provide medical billing and consulting services for its new client who has hundreds of physicians in 85 medical offices across the U.S.

Keeping with its controlled-growth policy of only taking on as many clients as its professional staff can manage, PBN and its new partner company plan to begin rolling out PBN's services to two locations per month. "Moving forward in this gradual fashion allows both PBN and our new client to adjust to new systems and build an efficient transition methodology for taking on additional offices more quickly in the future" said Jud Neal, PBN CEO and primary architect of the new partnership. "This also ensures that PBN will maintain its commitment to provide the same high-quality, high-touch services to our existing and future clients."

PBN plans to provide more detail about its new partnership in additional announcements in the future.

### **About PBN**
